message	It is a winery near the sky at an altitude of 840m to 864m in Shiojiri, Shinshu. Healthy fruits harvested from our own fields have a sugar content of 20 degrees or more. We produce a fruity and aesthetic wine without any unpleasant sour taste. "Making beautiful wines in a beautiful environment" The wines we deliver from Sun Sun Winery are carefully brewed under strict hygiene control. The company's vineyards are about 3 hectares. Our aim is not to plant in large quantities, only carefully produce high-quality grapes every day. The interior of the winery has a double-layer structure. It's hardly affected by the outside air and can be stably controlled to a low temperature to take a long time to make the slow maturation wine.
